reduce allergens by 52%

Your new Kiwivac AVT Central Vacuum System will give anyone in your family who suffers from allergies, asthma or eczema, freedom from the leading causes of these conditions. Scientific research proves that a professionally installed Central Vacuum System will reduce the leading triggers of:

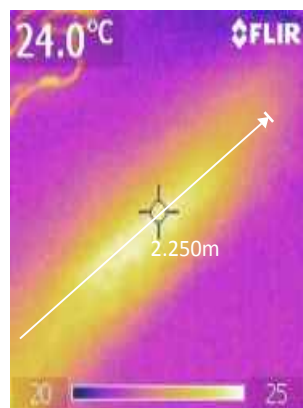

- ✓ **Asthma**
- ✓ **Allergies**
- ✓ **Breathing conditions**
- ✓ **Skin conditions**

By removing more dirt, dust, pollens, dust mites etc than any other cleaning method, a central vacuum system will make a real difference to your family's health. None of these triggers are exhausted back into the air of the room being cleaned!

The No.1 New Zealand made Central Vacuum System

Kiwivac AVT central vacuums are up to **4 x more powerful** than a portable vacuum cleaner, removing more dust and dirt from the room and, unlike a portable will not recirculate anything back into your home.

We tested a common portable vacuum cleaner with an infrared heat gun. It showed that the warm air from the exhaust travelled for more than 2.250m.

This warm air is full of common allergens and dust particles, rising high into the room to settle on your surfaces and furnishings.

A Kiwivac AVT central vacuum system **does not exhaust any air, dust or particles** back into the room being cleaned.

Your power unit is installed in the garage or under the house and can be exhausted to the outside removing **100%** of dust and dirt from your home!

...a cleaner quieter vacuum system.

about us

Since 1983 Kiwivac AVT has been 100% New Zealand owned and operated, we understand New Zealand homes. Our New Zealand wide network of Kiwivac AVT experts have installed over 13,000 systems and are trained to:

- ✓ **Design your system to perform at its best at all times**
- ✓ **Design your system to be user friendly**
- ✓ **Consult with you on the best design, hose length and tools for your needs**
- ✓ **Carry out the installation to the highest standards**
- ✓ **Ensure your installation is Building Code compliant**

buy new zealand made

In 1992 Kiwivac AVT set the benchmark when we began manufacturing our power units in New Zealand. In 2009 we added the range of AVT - Advanced Vacuum Technology power units with the unique slide plate emptying system to our NZ made product range. We manufacture using the best quality materials sourced from the USA, New Zealand and Canada.

The uncompromised quality of our:

- ✓ **Power units**
- ✓ **System design**
- ✓ **German designed tool sets**
- ✓ **Pipe network and installation**
- ✓ **After sales service**

Guarantees complete customer satisfaction and we back that up with a lifetime warranty (Refer to warranty details on back).

investing in your home & family

A well designed and professionally installed central vacuum system will add significant value to your home, your family's well being, your lifestyle and to your pocket. The power and ease of your central vacuum system will mean:

- ✓ **Less time cleaning**
- ✓ **Less worry about the health of your home**
- ✓ **Less family health concerns**

With our long life motors and technically advanced products giving you:

- ✓ **A deeper clean**
- ✓ **Years of additional life to your floor coverings**
- ✓ **A quiet system that is far less intrusive**
- ✓ **Freedom from heavy vacuum cleaners to carry upstairs and banging into your furniture and walls.**
- ✓ **More tool options so that you can deliver the same deep clean to all your furnishings.**

"i love it, it's the best vacuum cleaner I have ever had, it has plenty of suction and you can feel the carpets are clean after vacuuming. I wouldn't go back to a portable ever again. It's so quiet you can even hear the phone ringing.

Our son's asthma has improved since we put in a Kiwivac in our existing home.

**Carolyn Thompson,
Karaka, Auckland.**

your project is...

a new home? Kiwivac AVT central vacuum systems can be installed in all types of modern design and construction including:

- ✔ **Timber**
- ✔ **Masonry**
- ✔ **Steel**
- ✔ **Architectural**

Every day your Kiwivac AVT expert is visiting new construction jobs from 100m² to 1500m² and designing the pipe network for the home.

No home is too small or too big for a central vacuum system and every home and family benefits from having one installed.

a renovation? This is the ideal time for your Kiwivac AVT installer to design and install the pipe network. Your renovation project may be:

- ✔ **A Villa**
- ✔ **A Bungalow**
- ✔ **Art deco**
- ✔ **Concrete**
- ✔ **An extensive architectural rebuild**

Your Kiwivac AVT expert will be able to work out a way to install your central vacuum system. We love a challenge! We will design a central vacuum system for the new and existing parts of your home.

an existing home? Almost any existing home in New Zealand can have a Kiwivac AVT central vacuum system installed whether your home is built in:

- ✔ **Brick**
- ✔ **Weatherboard**
- ✔ **Masonry**
- ✔ **Plaster**

At Kiwivac AVT we pride ourselves on our "can do" attitude. With clever design and a good understanding of construction, your Kiwivac AVT expert will design and install a system for your existing home so you too can benefit from a professionally installed central vacuum system.

most systems are installed in 1 day

typically your floor coverings are the most expensive single item in your home. Carpet, tiles, timber, polished concrete, these are a huge investment. Your Kiwivac AVT expert will help you select the best tools to:

- ✔ **Add years of life to your floor coverings**
- ✔ **Make your cleaning job easier**
- ✔ **Give your furnishings a more thorough clean**

standard tool set

Every Kiwivac AVT system comes with our superior Standard Tool Set, made from the best quality materials. Our tools won't leave marks on your skirting and furniture.

The soft horse hair on the dusting tools is both plush and plentiful. The 2 piece Upholstery Tool takes care of your furniture. Our Crushproof Hose moves up to 18% more air than most others.

on/off deluxe tool set

Upgrade to our premium Deluxe Tool Set with:

- ✔ **On/off Switch on the handle**
- ✔ **Wall Protector Sock pre-fitted to the hose**
- ✔ **On Board Tool Caddy for 3 tools**

more tools, more choice...

We stock the largest range of tools and accessories in New Zealand. Our high quality tools will help you take care of your floor coverings and furnishings. See our website or accessories brochure for the full range.

"your follow up service In helping to find the right attachments for the different floor surfaces was spot on. The cleaning is now a breeze and we would have no hesitation in recommending you and your product."

**John & Louisa Gowing.
Warkworth.**

technology

We only manufacture Central Vacuum units which require the minimum amount of handling the dust, dirt and allergen causing agents, collected in your power unit.

Our research and years of experience has led us to develop two of the most hygienic and user friendly emptying methods available - the patented Slide Plate system and our Micro Filter Sealed Bag system.

You won't get a face full of dust or your hands dirty emptying our power units!

premier series

Models KB1 - KB2 - KB3

Our disposable bag range virtually eliminates contact with dirt and dust. The double layered micro filter lined bags last most families 4 - 6 months.

By tumbling the dust in the bag, rather than using a cyclonic action, there is minimal suction loss until the bag is completely full. When its full simply remove and insert a new bag, it takes seconds.

Each time you do this you've just changed the primary filter in the triple filtration system - making our premier series power units virtually maintenance free!

power unit specifications

Model KB1 motor performance	No. Of Inlets	House size	Airwatts	Waterlift	Dust Capacity	H x W Dimensions
	Up to 6	Up to 250m ²	461aw	2836mm	19 L	800 x 320mm

gone!

AVT slide plate series

Our patented Slide Plate Cyclonic power units feature the most hygienic emptying system in the world. The power unit is directly and cleanly emptied into a household rubbish bag by withdrawing the slide plate from its base a couple times a year. Close the slide plate and you are done. There is no getting your hands dirty emptying the system.

To make our Slide Plate Cyclonic power units truly maintenance free we searched the world for the best filter made. Our TEFLON lined self cleaning filter ensures our power units are maintenance free.

power unit specifications

Model KSP1 motor performance	No. Of Inlets	House size	Airwatts	Waterlift	Dust Capacity	H x W Dimensions
	Up to 6	Up to 250m ²	461aw	2836mm	25 L	1025 x 320mm

Model KSP1

Models AVT2 - AVT3

Model AVT4T

Patent no. 531422 and Design Registration no. 404 591 apply.

making a difference

Your Kiwivac AVT power unit is built to last and should be the last vacuum you ever need to buy.

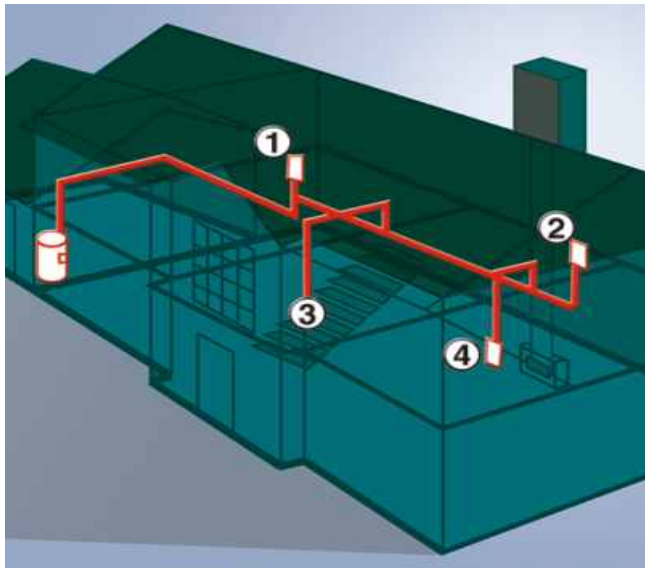

All the recyclable metal, paper, cardboard, and plastic that are used in our manufacturing processes are recycled.

Kiwivac AVT power units are serviceable. Motors are replaceable and old motors can be recycled.

Our environmentally friendly disposable paper bags break down in landfills or can be composted in your own garden.

Reduce, Reuse, Recycle
